

SOLAR LED LAMP

BM PRO's Solar LED Lamp is a reliable and rechargeable multi-purpose light source. Due to its small size, lightweight and ability to manoeuvre, the BM PRO Solar LED Lamp has proved extremely popular for use in all camping, caravanning and outdoor applications.

Simply position the BM PRO Solar LED Lamp in direct sunlight during the day and enjoy up to 10 hours continuous use throughout the night. Without the need for plug-in charging, the Solar LED Lamp is ready to go when it's needed most.

This environmentally friendly Solar LED Lamp provides strength in performance as its white-light LED provides illumination in the darkest of camping situations. The high-efficiency silicon solar panel and PHET® lithium iron phosphate battery have also been optimally designed to speed up charging time.

Key Features

- › High-efficiency solar panel
- › PHET® lithium iron phosphate battery
- › Powerful white-light LED globe
- › Two position power switch
- › Voltage balancing board protection
- › Hook (for wall mount purposes)
- › One year lithium iron phosphate and LED status warranty

GENERAL SPECIFICATION

Power Switch	3A 250VAC
Solar Panel	1W
LiFePO4 Battery	3.2V
LED	0.5W
Operation Time	8 -10 hours
Operating Temperature	-20 to 60 degrees C
Product Dimensions (LxWxH)	203 mm x 105 mm x 68 mm (when fully folded)
Weight	Approx. 420 g
